Objective

Entry level Data Analyst with a BS in Information Technology and hands on experience in SQL, Power Query, and Excel. Skilled in cleaning, transforming, and analyzing datasets to support business decisions. Seeking to apply analytical skills and grow into a strong real world data analyst role.

- Data Tools: SQL (SQLite), Power Query, Excel (COUNTIF, AVERAGE, MEDIAN, MODE)
- Data Cleaning: Handling missing values, duplicates, inconsistent formats
- Database Management: Table creation, CSV import, primary keys
- Reporting: Pivot tables, dashboards, summary reports
- Other Software: Microsoft Office (90%), Adobe Photoshop (90%), Illustrator (85%)
- Soft Skills: Accuracy, attention to detail, problem solving

Experience

Freelance Graphic Designer | May 2023 – 2024

- Designed marketing materials, logos, and social media graphics for diverse clients
- Collaborated with businesses to develop brand identities and visual strategies
- Delivered high-quality projects under tight deadlines with consistent client satisfaction
- Utilized Adobe Photoshop and Illustrator to produce professional-grade designs

Data Encoder – Khdaire Trading & Construction Co., Saudi Arabia | Aug 2014 – Aug 2018

- Entered, validated, and maintained large volumes of business data.
- Ensured accuracy and consistency across records, supporting operational reporting.
- Gained practical experience handling raw datasets and preparing clean outputs.

Family Driver – Saudi Arabia *(August 2025 – June 2026)*

- Provided safe and reliable transport services for household members.
- vehicle maintenance to ensure efficiency and safety.
- Demonstrated discipline, punctuality, and adaptability in a multicultural environment.

Education

BS Information Technology – Divine Word College of Laoag (2008 – 2012)

TESDA Courses:

- Visual Graphic Design NC III – St. Gabriel International Centre (2023 – 2024)
- Electrical Installation & Maintenance NC II – Overseas Technical Institute
- Data Analytics Level III - GESTAAC INC

Projects (Training & Practice)

- Customer Data Cleaning (Power Query): Standardized text fields, fixed spend values, removed duplicates, created flag columns.
- Employee Dataset Cleaning (SQL): Replaced invalid values, applied filters, used window functions for analysis.
- Sales Analysis (Excel): Built pivot tables and applied statistical formulas to summarize trends.
